

# Eastcoast Site Work

SOIL EROSION AND SILT FENCE SPECIALISTS

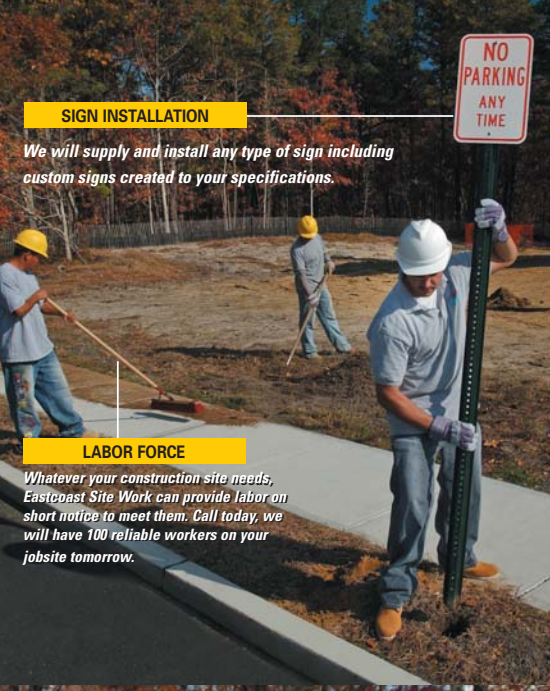

For 15 years Eastcoast Site Work has provided construction site preparation, maintenance and labor to builders throughout New Jersey and eastern Pennsylvania. Unlike its competition, most of which provides construction site maintenance services on a small scale, Eastcoast Site Work has more than 70 full-time employees and can put 100 reliable workers on a job site with a day's notice. Specializing in soil erosion prevention and silt fence installation, Eastcoast Site Work makes and warehouses its own silt fencing for immediate availability and quality control. The company's diverse list of construction site services includes tree removal, inlet protection, street sweeping, lawn maintenance, sign design and installation, trench digging, drive pads and snow removal. Says President Michael Garofalo: "We open up job sites in a fast, efficient manner. We bring reliability and professionalism to every construction site we work."

### SIGN INSTALLATION

We will supply and install any type of sign including custom signs created to your specifications.

### LABOR FORCE

Whatever your construction site needs, Eastcoast Site Work can provide labor on short notice to meet them. Call today, we will have 100 reliable workers on your jobsite tomorrow.

### LANDSCAPING

Eastcoast Site Work can handle any commercial or residential landscaping job.

### LAWN MAINTENANCE

We keep lawns green and free of weeds so new developments open with a mature look.

### HEADWALL CLEANING & MAINTENANCE

We clean and maintain headwalls to ensure drainage systems work properly.

### SAFTY FENCE INSTALLATION

### INSTALL AND SECURE SNOW FENCE

Eastcoast Site Work installs snow and safety fencing with speed and precision that helps make a construction site operational quickly.

### BRUSH REMOVAL

Our workers will clear your land no matter how thick the overgrowth.
